RE: Response to Stipulation UMC 817.46 - 1 - RS, Sedimentation Pond Design, Coastal States Energy Company, Skyline Mine, ACT/007/005, Carbon County, Utah

SUMMARY:

The following stipulation was attached to the permit issued to Skyline Mine in December, 1989:

Stipulation UMC 817.46-(1) - RS

1. Prior to June 1, 1990, the applicant must submit revisions to the mine facilities area sediment pond design as necessary to demonstrate compliance with UMC 817.46 and UMC 817.49. These revisions may include revised mine water discharge values, drainage area values, sediment volume and yield predictions, stage - volume calculations, and detention time modeling.

The operator responded in writing on May 30, 1990 citing current mining operation changes that prohibit an accurate assessment of the mine water/sedimentation pond design. It is therefore recommended that the stipulation be revised as follows:

Stipulation UMC 817.46-(1) - RS

1. Prior to October 1, 1990, the applicant must submit revisions to the mine facilities area sediment pond design as necessary to demonstrate compliance with UMC 817.46 and UMC 817.49. These revisions may include revised mine water discharge values, drainage area values, sediment volume and yield predictions, stage - volume calculations, and detention time modeling.
